Accuratus 5010 – Wireless Bluetooth & RF 2.4GHz Multi-Device Mini Keyboard with Trackball with Adjustable Tilt

About

The Accuratus 5010 is a compact mini keyboard featuring an integrated high-resolution optical trackball, designed to provide complete keyboard and mouse control from a single device. Supporting both Bluetooth and RF 2.4GHz wireless connectivity, it can pair with multiple devices and switch between them with ease, making it ideal for modern multi-device workspaces. The left and right mouse buttons are conveniently positioned in the top left corner for comfortable navigation, while the space-saving layout makes it perfect for environments where desk space is limited, such as retail, POS, kiosks, industrial applications, meeting rooms, and home offices.

Built using ultra-reliable membrane key technology, the 5010 offers a comfortable and responsive typing experience. The durable, high-contrast key legends feature a protective UV coating to help prevent fading and wear, ensuring the keyboard maintains a professional appearance and excellent readability throughout its lifespan.

Compact, Connected, In Control - The ultimate wireless mini keyboard with integrated trackball.
